**Subject:** For all staff involved in teaching: Proctor's Education Update (6)

Dear all staff involved in teaching,

Please see a link in the email below to the latest Weekly Update from the Proctor, which includes information of interest and use to all staff involved in teaching including personal tutors - Notably this update includes information on graduation this academic year, some info on dual delivery plans for next semester and the exam tool that students will use over the next two weeks to complete their exams.

As the BSc and MSc exam diet approaches I would like to thank in advance all staff involved in assessment (including dissertation marking etc), and for all those still involved in ongoing teaching for ScotGEM and support of all other students within our School.

Best wishes and stay safe,  
Alun
