# RESPIRATORY RESEARCH in Fife

...benefits healthcare and the health of our community.

Medical research forms a valuable and exciting part in providing high quality medical care. With recent investments from both NHS Fife and the Scottish Government, we are now in an even stronger position to develop respiratory research in Fife.

Through the process of careful planning and with safety paramount, we hope to carry out high quality research. Our ultimate goal is to improve the care of those in our community with respiratory illness.

If you would like to know more about our studies and/or would like to be involved, either as a researcher or as a patient, you are very welcome to contact us! We would love to hear from you!
